SUMMARY

A trilingual Informatics student in Taiwan (Japanese, English, Chinese) focused on mastering CS concepts through technical discussions in a global environment. Through Build@Mercari, I gained hands-on experience in Go and professional workflows, fostering a commitment to writing maintainable code. I aim to leverage my adaptability and technical foundation to contribute to diverse engineering teams.

EDUCATION

Yuan Ze University

September 2023 – Present

International Bachelor Program in Informatics

Expected Graduation: June 2027

- Recipient of the Taiwan Ministry of Education (MOE) Scholarship: Awarded a full 4-year scholarship for academic excellence
- Relevant Coursework: Data Structures, Algorithms, Programming (C++/Python)

ACADEMIC PROJECTS

Reversible Data Hiding in Encrypted Images (RDHEI)

September 2025 – Present

Yuan Ze University — Advisor: Cheng-Ta Huang

- Identified inefficiencies in existing RDHEI literature and developed a CNN-based prediction model using PyTorch to enhance feature extraction.
- Aiming to optimize the trade-off between higher embedding capacity and image restoration quality.
- Performance is evaluated using PSNR and SSIM; currently conducting comparative analysis against baseline methods with a developed prototype.
- Collaborating with a senior student to co-author a research paper and deliver a final presentation on the findings.

Used Technologies: Python, PyTorch, CNN

ACTIVITIES

Build@Mercari 2025

March 2025

Mercari, Inc.

- Participated in a specialized training program for software engineering, gaining hands-on experience with Go and backend development principles
- Engaged in technical discussions and peer code reviews within a team to solve complex programming assignments, ensuring code quality and efficient problem-solving
- Practiced modern development workflows, including Git/GitHub for version control and collaborating in a simulated professional engineering environment

Used Technologies: Go, Git, GitHub, Backend Development Basics

Design Officer, Student Association

June 2024 – June 2025

Yuan Ze University

- Coordinated orientation events and cultural festivals within a diverse team of 10+ members, conducting all operations in English and Chinese
- Designed promotional materials and managed venue logistics, ensuring seamless event execution and deadline compliance

TECHNICAL SKILLS

Programming: C++ (2+ years), Python, Go, HTML/CSS

Tools: Git/GitHub, Linux (CLI), Docker, VS Code

Languages: Japanese (Native), English (TOEIC 810), Chinese (TOCFL B1)
